*****WATER SERVICE NOTIFICATION*****

June 30, 2022

Genesee County Drain Commissioner's Office, Division of Water and Waste Services (GCDC – WWS) announces the commencement of a week-long routine flushing maintenance program for waterlines in several Genesee County communities.

The 1 week program will begin July 5th, and flushing will occur between the hours of 7:00 a.m. and 7:00 p.m. each day. Residents may experience temporary discoloration while waterlines in their vicinity are being cleared. No boil water notices are expected, and water quality will be maintained within normal parameters.

This type of maintenance is conducted every year by GCDC-WWS in communities where we maintain O&M services. It is advantageous to implement this maintenance program during the summer months, when water usage is at its highest, in order to have the greatest impact on the entire system. Flushing the waterlines will remove any built-up sediment and minerals, and help maintain color, odor, and taste of the water year-round. This work is part of a robust and continuous maintenance program by GCDC-WWS that ensures the ability to provide the highest possible quality water to our residents.

The following communities are scheduled to be part of the maintenance flushing beginning on July 5th:

Clayton Township
Davison Township
Flint Township
Flushing Township

Gaines Township
Montrose Township
Mt Morris Township
Mundy Township

Richfield Township
Thetford Township
Vienna Township

If you have questions or concerns related to your community's water service, please contact GCDC-WWS Chief Deputy Drain Commissioner Dan Potter at 810-732-7870. The after-hours emergency number for the Genesee County Drain Commissioner's Office is 810-762-3626.
